

TRANSFORM YOUR LIFE

Godrej **interio**[®]

For those who love their furniture...

HEC FURNITURE CARE

Welcome to the world of Godrej Interio!

Congratulations on buying a Godrej Interio product. We take great pleasure in bringing you this product, keeping in view the current trends and your needs. This care booklet is specifically applicable to Home Entertainment Centres, TV Units, Study Tables, Computer Tables and other occasional furniture made using wood/wood derivatives.

Your product has been made with great care to deliver the best performance.

The following pages contain useful information and care guidelines that will help you enhance the performance and life of your precious furniture.

Table of contents

|--|---|
| Care for Wooden Parts | 1 |
| Special Instructions for Decorative Paper Laminated Surfaces | 3 |
| Care for Glass Parts | 4 |
| Transportation and Shifting of Furniture | 5 |
| Material Properties & Natural Occurrence | 7 |
| Warranty Policy | |

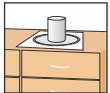

Care for Wooden Parts

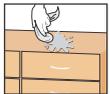

Dos

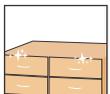

Cleaning and dusting your furniture on a regular basis will help extend the life of the product. Dusting is best done with a mildly damp cotton cloth. Before dusting, lightly moisten the cloth with mild non-alkaline soap and water. A dry cloth can leave hairline scratches on the finish. However, for decorative paper laminates use a soft dry cloth. Please refer to the care section on decorative paper laminated surfaces for details. Ensure that no water is left in the grooves and edges after cleaning as this will result in the beginning of deterioration of the wood which will ultimately result in swelling and weakening of the structure.

Use coasters/mats/tablecloth to keep hot dishes on the furniture surface.

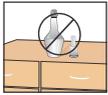

Clean spills immediately, preferably by blotting with a soft and dry cloth/sponge.

For natural wooden/natural veneered surfaces, hire a professional to polish the furniture once a year.

Don'ts

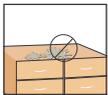

Avoid contact of solvents, alcohol, nail polish and polish removers with the furniture's surface.

Avoid sliding objects across the furniture's surface. Always lift and place the object.

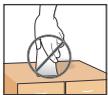

Do not allow sharp objects to come in contact with the furniture's surface.

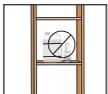

Prevent contact with water and corrosive substances as they may damage parts of the product.

Avoid placing the furniture in direct sunlight, hot conditions (near fireplaces, heaters, radiators) and damp conditions (areas like basement, attic, garages and areas prone to leakage, seepage) to prevent deterioration in the furniture quality.

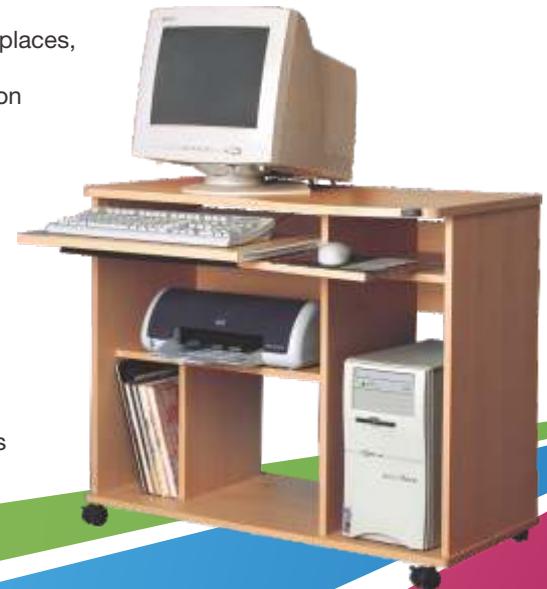

Do not polish processed wooden surfaces (laminated, membrane pressed). With proper care, these surfaces will maintain their finish.

Avoid using abrasive cleaning agents like nitro based thinners, acetone, nail varnish removers as these can damage the surface.

While mopping the floor, avoid contact of the mop with the table legs as prolonged contact may result in fading of the finish/colour.

Special Instructions for Decorative Paper Laminated Surfaces

Dos

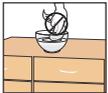

Regular cleaning and dusting of your furniture will help preserve its quality in the long run.

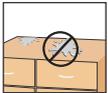

Direct contact of liquids with laminated surfaces should be avoided at all costs. Clean spills immediately, preferably by blotting with a soft and dry cloth/sponge.

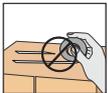

Don'ts

Do not clean with a damp cloth. Only a dry and soft cloth must be used for cleaning.

Do not expose paper laminated surfaces to humid conditions.

Do not use any sort of adhesive tape on laminated surfaces, the removal of which will cause peeling of the laminate.

If needed, please find out from a Godrej representative, the type of lamination used in your furniture.

Care for Glass Parts

Do

Cleaning and dusting your furniture on a regular basis will help extend the life of the product. For cleaning and maintaining the sparkle of glass surfaces, use standard glass cleaning liquids.

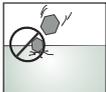

Don'ts

Cleaning the surface with a dry cloth can leave scratches on the glass surface.

Do not slide objects across the tabletop. Always lift and place the objects.

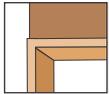

Avoid any kind of impact on the glass surface as it may cause the surface to shatter/break/crack.

Transportation and Shifting of Furniture

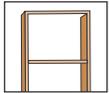

While shifting furniture within one's home

Check the furniture thoroughly for any loose joints, cracks etc. and fasten/secure or fix the same before shifting.

Always empty the furniture completely of all contents including removable shelves and drawers and lock the doors before shifting.

Always remove the drawers and shelves before shifting the furniture.

The furniture should not be dragged or pushed as this may lead to misalignment of the panels and hence weakening of the structure.

The furniture should always be lifted and placed in a new position. It should not be lifted holding the shelves. The furniture should be held at all 4 corners. Use sufficient manpower to lift and move the furniture.

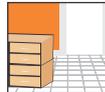

The Home Entertainment Centre should be tilted either backwards or sideways and then lifted from the base. Use sufficient manpower to lift and move the furniture. It is advisable to dismantle a HEC even when moving from one room to another. Please contact a company representative for dismantling and reassembly.

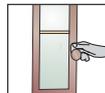

In case of any difficulty it is advisable to contact company representatives, more so in the case of heavy and bulky furniture.

While lifting, always hold the furniture at its strongest point.

Move the furniture slowly and carefully. Bumping it against doorways, walls etc. can cause damage to the furniture.

Always keep the drawers locked and loose parts secured while shifting.

When moving home...

- Transporting furniture from one location to the other involves dismantling/reassembly
- In case of Home Entertainment Centres, it is advisable to dismantle them even when moving from one room to another
- Please contact a company representative for dismantling and reassembly

General Instructions

- Do not stand or sit on the furniture top as this would cause damage to the furniture. This usually happens when someone is trying to access heights in the house (for cleaning, retrieving objects etc.) and uses the surface as the means.
- We recommend you to open and close the doors, drawers and lids gently. When open, the angle of the door should not push beyond its body level i.e. 90 degrees.
- Before opening the drawer or the door, check whether they are locked or unlocked. Do not force open the doors/drawers when they are locked.
- Avoid dropping of objects on the top they may damage the surface
- Maximum load bearing capacities of the shelves vary from model to model. Please a contact company representative for information on the same.

Material Properties & Natural Occurrence

Defects arising due to natural wear and tear/property of basic material used:

- Wood is a natural product and as such, natural wood surfaces have irregularities in their structure and colour, which are unavoidable. Such irregularities are characteristic features of natural wood. However, processed wood surfaces show more uniformity in terms of structure and colour.
- Natural wood shrinks or expands under extremely low or high atmospheric moisture respectively. Therefore, the halves of a table may part slightly or a few tiny openings may appear on a solid wood surface or on the finger jointed surfaces. This constitutes neither a quality defect nor a cause for complaint.

WARRANTY POLICY

- BEDS – METAL AND WOODEN • HEC/WALL UNITS • COMPUTER TABLES • COFFEE AND CORNER TABLES • SOFAS/SOFA-CUM-BEDS
- STUDY CENTRES • CHESTS • WOODEN WARDROBES • SHOE CABINETS • DINING TABLES – METAL AND WOODEN • DRESSING TABLES
